COVID-19 Impact and Recovery Report: Resident Sentiment & Travel-Related Measures

Updated: July 8, 2020

This document provides an evergreen assessment of the situation in Canada. It has the following sections:

1. **Resident Sentiment**: The level of ‘welcome’ that residents from each province/region are feeling towards accepting visitors into their communities. In addition, sentiment towards receptivity of seeing advertising promoting their communities.

2. **Travel-Related Measures**: A summary of the travel and tourism-related measures in place in each province and territory.

3. **Methodological Notes**: An explanation of the methodologies in the different sections and relevant sources.

### 1. RESIDENT SENTIMENT

Destination Canada is tracking sentiment to understand the level of ‘welcome’ that residents of each province/region are feeling towards visitors. The data excludes residents from the northern territories. Respondents are asked to rate their level of agreement with the following statements:

- I would welcome visitors travelling to my community from **other communities near me**
- I would welcome visitors travelling to my community from **other parts of my province**
- I would welcome visitors travelling to my community from **other parts of Canada**
- I would welcome visitors travelling to my community from **the United States**
- I would welcome visitors travelling to my community from **other countries** (outside of the United States)

**Percentage that Strongly or Somewhat Agree with Welcoming Visitors to Their Community**

An additional question asks about receptivity of seeing advertising promoting communities:

- How would you feel if you saw an advertisement today promoting your community as a place for visitors to come when it is safe?

### 2. TRAVEL-RELATED MEASURES

In addition to a federal government requirement mandating 14-day self-isolation for those who are eligible to enter Canada¹, individual provinces and territories have implemented measures on travel between provinces and territories. The below table outlines self-isolation requirements for domestic travellers entering into each province or territory, as well as restrictions on travel across provincial and territorial borders. Tracking these measures is challenging given the fluid nature of COVID-19. This information was collected by provincial and territorial tourism marketing authorities and relevant tourism departments and current as of July 8, 2020.

Residents of Western Canada and Northwestern Ontario do not need to self-isolate for 14 days when entering MB; 14-day self-isolation for all other domestic travellers entering MB, except for essential workers.

No travel restrictions for domestic travellers entering MB, but self-isolation required (except for residents of Western Canada and Northwestern Ontario); highway checkpoints established to educate travellers; travel restrictions to northern communities lifted on June 26.

As of June 1, some Parks Canada places began a safe, gradual reopening of some outdoor areas at national parks, national historic sites and national marine conservation areas. Openings will differ across the country. Please consult the Parks Canada website for an updated list of specific Parks Canada locations with special instructions: https://www.pc.gc.ca/en/voyage-travel/securite-safety/covid-19-info#locations

Most provinces and territories have implemented a framework to guide reopening strategies catered to their individual circumstances. Since each province and territory is starting from a different baseline to implement the re-opening of their local economy, the phases and stages are not congruent across jurisdictions. The table below outlines the current status of restrictions on tourism related sectors as of July 8, 2020. Unless noted, business must operate with sufficient social distancing measures in place.

3. METHODOLOGICAL NOTES

I. Resident Sentiment: Approximately ~1,800 responses for the resident sentiment questions are collected from Canadians on a weekly basis through an online methodology. The study is weighted to be representative of the Canadian population according to census data, excluding the northern territories. The questions are being asked by Leger, a market research provider. Destination Canada has requested a minimum of n=200 respondents every week from each province/region, with a minimum of n=50 respondents identifying as living in rural communities within each province/region.

II. Travel-Related Measures: In conjunction with provincial and territorial partners, Destination Canada has sourced information directly from provincial and territorial government websites; additional insights are provided by provincial and territorial partners where relevant or where information from official sources is incomplete. The intention for this section is to provide the latest available information as of the date of the report. Given the evolving nature of these measures and phased opening strategies, readers are encouraged to seek information from official government sources for the most current information.
