COVID-19 Impact and Recovery Report: Travel-Related Measures
Updated: September 22, 2020

This document provides an evergreen assessment of the situation in Canada. It has the following sections:

1. **Travel-Related Measures**: A summary of the travel and tourism-related measures in place in each province and territory. A map outlining the current travel restrictions and self-isolation requirements is available on Destination Canada’s website: [https://caen-keepexploring.canada.travel/canada-nice#canadatmap](https://caen-keepexploring.canada.travel/canada-nice#canadatmap)

2. **Methodological Notes**: An explanation of the methodologies in the different sections and relevant sources.

### 1. TRAVEL-RELATED NOTES

In addition to a federal government requirement mandating 14-day self-isolation for those who are eligible to enter Canada¹, individual provinces and territories have implemented measures on travel between provinces and territories. The below table outlines self-isolation requirements for domestic travellers entering into each province or territory, as well as restrictions on travel across provincial and territorial borders. Tracking these measures is challenging given the fluid nature of COVID-19. This information was collected by provincial and territorial tourism marketing authorities and relevant tourism departments and current as of September 22, 2020.

Legend: No measures in place ● Some form of measures in place ×
As of June 1, some Parks Canada places began a safe, gradual reopening of some outdoor areas at national parks, national historic sites and national marine conservation areas. Openings will differ across the country. Please consult the Parks Canada website for an updated list of specific Parks Canada locations with special instructions:

Most provinces and territories have implemented a framework to guide re-opening strategies catered to their individual circumstances. Since each province and territory is starting from a different baseline to implement the re-opening of their local economy, the phases and stages are not congruent across jurisdictions. The table below outlines the current status of restrictions on tourism related sectors as of September 22, 2020. Unless noted, persons must gather and business must operate with sufficient social distancing measures in place.
