COVID-19 Impact and Recovery Report: Domestic Travel
Updated: August 3, 2021

In response to COVID-19, Destination Canada has established a framework and analytical approach to identify signals from consumer and industry behaviour to understand when, where and at what pace travel and tourism will resume.

Destination Canada collaborated with partners in destination marketing, media, technology and travel to identify these indicators and signals. The framework has identified multiple phases of recovery, which aligns with user sentiment and intent to travel. For smaller provinces and territories, it is cautioned that lower availability of data can impact the reliability of signals. Given these limitations, Destination Canada has provided an assessment for all provinces and territories to the best of its ability. The summary of the methodology and terms can be found in Methodological Notes.

As a complement to this document, Destination Canada also provides updates to travel related measures that are currently in place for each province and territory, please reference the Travel Related Measures document: https://www.destinationcanada.com/en/coronavirus

Based on Destination Canada’s assessment of current travel interest and the increasing ability of domestic travellers to return to their home province or territory without self-isolation requirements, tourism businesses are encouraged to focus on messaging that drives travellers to book their domestic travel now.

Summary of current phase for each province and territory, as of August 3, 2021:

Destination Canada assesses that Nova Scotia progressed into the Inter-Provincial phase for the week ending July 18 and Newfoundland & Labrador progressed into the Inter-Provincial phase for the week ending August 1.

- I - VI refer to phases of the COVID-19 Response framework.

### Travel Search Index
- Accommodation search is occurring within the territory and within Canada, but not internationally.
- YOY intra-territorial = higher than 2019 level; a lot of fluctuations.
- YOY inter-provincial = nearly recovered to 2019 level; flat since the week ending June 13, 2021.
- YOY international = very low level; generally decreasing since the week ending July 11, 2021.

### Accommodation Searches on OTA
- Accommodation booking is occurring within Canada but not internationally.
- YOY intra-territorial = data not available.
- YOY inter-provincial = higher than 2019 level; generally increasing since the week ending May 30, 2021.
- YOY international = data not available.

### Rate of Hotel Booking
- Accommodation booking is occurring within Canada but not internationally.
- YOY intra-territorial = data not available.
- YOY inter-provincial = higher than 2019 level; generally increasing since the week ending May 30, 2021.
- YOY international = data not available.

### Rate of Air Travel
- For the week ending August 1, 2021, YOY air bookings from Nunavut to other inter-provincial destinations is up 72% compared to the same period in 2019. This represents the strongest week for air bookings since March 2020. The past 6 weeks in a row have seen YOY air bookings higher than 50%.
- Intra-territorial air bookings for the week ending August 1, 2021 are up 56% compared to the same period in 2019. This represents the strongest week for air bookings since March 2020. The past 4 weeks in a row have seen YOY air bookings higher than 2019 levels.

### New COVID Cases
- The number of weekly new cases in Nunavut for the week ending August 1, 2021 was zero. Nunavut has recorded no new cases since the week ending June 20, 2021.

Legend:  
- Progress to date  
- Not there yet  
- Signal not applicable

*Note: Dining Search Index and Activities Search Index have been removed from Destination Canada’s recovery analysis; these metrics were previously used to assess movement at a more hyper local level and most provinces and territories have moved beyond these stages.*
I. Recovery Signals: The Recovery Measures are listed in their order of importance in understanding travel behaviour, with the primary measures in black and supporting measures in dark gray. A brief description of each measure is provided below.

Destination Canada has developed a framework to understand the phases of recovery of the travel market. These phases are:

I. **COVID-19 Response**: Residents are not searching for or booking trips within their local area.

II. **Hyper Local Travel**: Residents are not booking trips within their province or territory.

III. **Intra-Provincial or Intra-Territorial Travel**: Residents are booking trips within their province or territory; however, actual travel could take place in the near future or at a later date.

IV. **Inter-Provincial Travel**: Residents are booking trips in other provinces or territories; however, actual travel could take place in the near future or at a later date.

V. **Tentative International Travel**: Some international bookings are occurring at reduced levels compared to 2019 but there are fluctuations in booking behaviours.

VI. **Regularized International Travel**: International bookings are occurring at levels that are stable.

A filled-in dot signifies that Destination Canada assesses we are in that phase of travel. An empty dot means we have not yet reached that indicator, and the crossed off box would signify that the measure does not apply for that phase of recovery. Some measures are currently being developed and will be updated as further progress is made.

II. Description of the Measures

- **Travel Intent Search Index**: Google search engine queries for travel-related keywords in 2020 compared to 2019 searches, broken down by week (i.e. week of April 19, 2020 vs week of April 19, 2019). Available for each market’s intra-provincial/territorial, inter-provincial/territorial and international travel search terms.

- **Rate of Accommodation Searches**: Weekly searches in 2020 for accommodation on a major online travel agency (OTA) against a rate of 2019 weekly searches, broken down by week. Available for each market’s intra-provincial/territorial and inter-provincial/territorial accommodation searches. This is provided as a rate rather than a volume of searches.

- **Rate of Accommodation Bookings**: Accommodation bookings in 2020 on a major OTA against a rate of 2019 bookings, broken down by week. Available for each market’s intra-provincial/territorial and inter-provincial/territorial accommodation bookings. This is provided as a rate rather than a volume of bookings.

- **Rate of Air Travel**: The volume of air bookings to other provinces/territories versus 2019 air bookings, broken down by week, as provided by IATA.

- **Weekly New COVID-19 Confirmed Cases**: The weekly total of new confirmed COVID-19 cases and the rate of new weekly cases per 100,000 population, as provided by the Government of Canada Health Infobase. Number of cases in the market and within other regions of Canada will likely be a determining factor for both governments allowing phased return of travel, as well as consumer confidence in traveling to a market.
